best game of all time I love this. epic game of the year nominee for sure. High quality realistic graphics Unreal Engine game that needs a beast PC in order to play it.

Very detailed models, textures, and the bathroom itself looks too very real.

My PC is AMD FX 6100 HD7870 and 6 GB RAM and FPS is no more than 20 and i can hear the fan spinning so loud to the point that it was about to overheat and turn itself off. So only play if you have specs such as RTX 2080 TI 64 GB RAM and an i9 CPU

Worth the 800MB download 10/10

I see a lot of potential in this dev. Maybe next time make a Masturbation Simulator and i would buy it as well
